Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,6-11 and 13-15 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 5,797,629 to Beagle. See the plumbing connection in figures 3-6 with the cap 42 having a generally uniform thickness wall and an annular shoulder 50 wherein the wall includes longitudinal ribs 36 evenly spaced about the circumference to prevent the hose 10 from turning when the hose is inserted onto the fitting 46 and into the cap 42 to which the cap acts to compress the hose. As to claims 7 and 14 note the flare at the end of second end of the cap.

Claims 1-4,6,8-11,13 and 15 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 5,722,150 to Swanson, III. See the plumbing connection in figures 4 and 5 with the cap 26 having a generally uniform thickness wall and an annular shoulder 34 wherein the wall includes longitudinal ribs 32 evenly spaced about the circumference to prevent the hose 12 from turning when the hose is inserted onto the fitting 14 and into the cap 26 to which the cap acts to compress the hose.

Claim Rejections – 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 5,722,150 to Swanson in view of applicant's admitted prior art figures 1 and 2. As noted above the Swanson coupling discloses the claimed device except for the particular structure of the window of claims 5 and 12. The prior art figures 1 and 2 of the present application disclose that it is known in the art to provide a similar type coupling with the configuration of a window 115 for viewing the hose for proper insertion. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the window as taught in applicant's admitted prior art figures to the cap of Swanson in order to provide a more secure coupling for

the inserted hose due to the increased insurance that the hose is properly seated in the cap due to visual inspection through the window.

Conclusion

Applicant's remarks with regards to claims 1-15 have been considered moot in view of the new grounds of rejection.

Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
